

RAIL & OTHER TRACK MATERIALS

Atlantic Track is a full-service manufacturing and distribution company capable of producing specialty trackwork and other components in our own plants. Regardless of the specification or application, our expertise is deep and our inventory is extensive. Whether you are looking for material that is new, used or reconditioned—whether it is obsolete or current—Atlantic Track is your one-stop-shop for all your railroading needs.

How can we meet or exceed your needs?

- New and relay rail in any section, grade, specification and finish. Standard order lengths of 80' and 39' with permissible AREMA shorts.
- Any size or type fastener manufactured to AREMA and ASTM standards. Track bolts, track spikes and screw spikes for various applications.
- Hardwood cross ties and switch ties available in either 6" or 12" increments beginning at 9'-0" up to 23'-0" in length. Nominal cross-section dimensions are 7" x 9", although other sizes are available.
- A multitude of base widths to accommodate any track, distributing the load from the rail to the tie for stability and gage. High quality new or relay, palletized or loose available.
